

IMPORTANT

1. Always include complete heater model and serial number so that any specification change can be considered for parts shipment. It can save time and expense.
2. Specifications are subject to change without notice.
3. We reserve the right to substitute functional replacements.
4. Order either by Kit or Component Part No.

Date Duct Furnace Series was Introduced or Recertified

The series is identified in the Model No. of the unit. The number following the model of the heater is the series number (Example: RX300-6; "6" is the Series No.). Replacement parts may be affected by the introduction of a new series.

* Codes 78 and 79, replacement venter motor and venter motor mounting plate, apply to units manufactured after the dates shown in the table below. For units manufactured prior to the dates listed, replacing a venter motor must be done with a venter motor replacement kit that includes new motor mounting plates.

Venter Motor Replacement Kits

Voltage	P/N	Applies to Heaters Manufactured
115V	132377	prior to 7/94 (Serial No. Code ATG)

Heat Exchanger and Components

Heat Exchanger Directional Air Baffles

Models X, CX, RX, CRX, RPV, CRPV Series 5, 6, 7 and 8 and packaged systems with these duct furnaces as components are equipped with a heat exchanger directional air baffle assembly as shown in the illustration on the left below.

When replacing a heat exchanger, check to see if the baffle assembly can be salvaged. If the baffle assembly cannot be salvaged, it will be necessary to order the parts (Codes 108-113) in the quantities listed and assemble and install replacement baffles. (These parts must be ordered separately and installed in the field. Baffles cannot be factory installed.)

Models HX, HCX, HRX, HCRX, HRPV, HCRPV Series 5, 6, 7, and 8 and packaged systems with "H" or "HC" suffix are equipped with only a rear top baffle support (Code 111) and a rear top baffle (Code 112) as shown in the lower left illustration. If these parts cannot be salvaged, order and install replacements.

These parts must be ordered separately and installed in the field.

Replacement Motors and Starters

Replacement motor **contactor**, #425CXX-11, is P/N **122376** with 24 volt coil for 115, 208, 230, or 460 supply voltage. Motors in the tables that are not highlighted have either a motor contactor or an optional starter.

Replacement IEC Starters and Overloads (P/N's are listed in the motor tables) - When ordering a replacement IEC starter (contactor) or overload, check the manufacturer's number on both parts. If the number is different than that listed, both components must be replaced.

Motors that are highlighted in gray in the motor tables do not have internal overload protection and must be used with the IEC motor starter and overload listed in the table.

If the motor has a NEMA starter, see the replacement parts on the right.

IEC Starter (Contactor)

IEC Adjustable Overload

IEC Starter (contactor) and overload are mounted on rail, P/N **111387**

Optional Remote Console

Optional RC style remote console includes a mounting ring so that the console may be either recessed or wall mounted. The box is of 16 gauge steel with knockout holes for field wiring. The cover is made of plastic with custom engraving. Order replacement parts for Option RC remote console by part number.

Starting 9/73 for X, XA, XB, XC, XD, XE, XG, XJ, PAK, DFAH, CX, CXE, CPAK RX, REB, RXE, RXJ, CRX, CREB, CRXE, RPAK, CRPAK; SC, SCA, SCB, SCE, SCJ Prior to Series 6; RPV, RPVE, RPBE, RPVAK, CRPV, CRPVE, CRPBE, CRPVAK Series 6; RG, CRG, RP, CRP, RGB, CRGB, RPB, CRPB, RGBL, CRGBL, RPBL, CRPBL, SSCBL XL, XLB, CXL, CXLB 125-400

This pilot is also used on:
EEXL, EEXLB, CEEXL, CEEXLB 125-400; EEDU, HEEDU prior to Series 6
RCG 2 through 5 ton with horizontal pilot

NOTES:

- Horizontal spark pilots for ignition systems other than G60, G65, G67 and G770 are no longer available.
- Kits also apply to models listed with the prefix "H"

*Included in all kits. Used only with the above models equipped with any Model G60 ignition controller, a Model G67BG-2, or a Model G67NG-2. Not used with ignition controller Models G67BG-5 and G770NGC-4. See Instructions on page 4.

- This pilot replaces Baso #J991HXW, natural gas P/N 45150, propane P/N 45141; #J994HXW, natural gas P/N 47303, propane P/N 47384. May be used as a substitution for J993HXW and J999HXW.

Instructions for connecting ignitor lead on replacement spark pilots to Model G60 and G67 ignition controllers (applies to Pilot Kits in CODES 451 and 454):

Crimp-on, 90° Rajah Terminal Connector, P/N 112647

Protective Boot, P/N 112648

Effective with replacement pilots purchased 9/91, these parts are required (in the kit or separately) when the replacement pilot is for heater Models listed in CODES 451 and 454 equipped with a Model G60 or G67BG-NG-2 ignition controller. (Note: These parts are not required when the ignition controller is a Model G67BG-5 or G770NGC-4.)

1. Identify the ignitor wire attached to the pilot electrode. Slip the 90° protective boot on to the wire, as illustrated →.
2. On the "open" leg of the 90° crimp-on terminal (P/N 112647), locate a flat, triangular spike tab punched in the metal. With the tip of a small, straight screwdriver, force the spike tab toward the inside of the connector. Straighten the tab to a vertical position.
3. Insert the ignitor wire into that same connector leg (just to the 90° bend) and push the wire onto the protruding spike tab, making sure that the tab penetrates the insulation. (Do not strip the ignitor wire.) Using a crimping tool or pliers, squeeze the sides of the terminal to form a "C" shape. The ignitor wire should now be firmly held by the terminal.

4. Slide the protective boot over the terminal. Holding the boot, attach the 90° Rajah terminal to the ignitor lead Rajah connector on the Model G60 or G67BG/NG-2 ignition controller.

NOTES:

Do not confuse RAM units with Model REC which is the currently manufactured evaporative cooling module. For parts for Model REC, see Form RZ-NA 708.

RAM units manufactured prior to 11/83 (Serial No. Code AIK) require ordering filter with frame.

When ordering replacement motor for Little Giant pump, order pump motor support bracket to accommodate the Beckett pump bracket, P/N 80664, for all voltages.
